

IKAR HWB 1,8

Retractable type fall arrester

The IKAR HWB 1,8 retractable type fall arrester is a personal fall protective equipment.

Equipped with lightweight aluminum housing with Dyneema® strap and swivel as standard. Standard connector IKV 11 (EN 360) IKV 28 (ANSI, CSA). Other carabiners available extra. The strap of the device is made of abrasion-resistant polyamide. The device can be used horizontally which makes it universal. It has been tested to work on steel edges without burrs using the VGII CNB / P / II.060 method (edge A 0,5 mm).
