

LOCKER SET

LOCKER SET is a special kit for guided self-arresting device (EN 353-2 and EN12841-A 100 kg), adapted to work in exposure or on sloping surfaces.

Locker Set is a connecting-cushioning element used to connect an employee with an anchor device permanently mounted to the object. Locker Set is versatile in use, it is perfect for flat and pitched roofs where you need to safely approach the edges of the roof or skylight. The Locker self-arresting device moves smoothly on the rope and can be if necessary locked in one move.

The kit includes:

- One LOCKER self-arresting device.
- One LOCKER SLING Lanyard
- 3 screw-on steel connectors
- Sewn-end rope with a length of 20 m
