

An extremely comfortable work helmet, which will perform perfectly during long hours of work at height. Durable ABS construction effectively protects the head and at the same time is not too heavy, so that even during a longer stay at the workstation it does not put excessive strain on the head.

Very good profiling of the helmet does not limit visibility upwards too much, which allowed to maintain a wide viewing angle. The place to attach the protective glass and earmuffs makes it easy to configure depending on your needs. The adjustment system is easy to use and has a wide range, so there should be no problems with its adjustment.

Main features:

- The shell is made of high-strength ABS material;
- Easy adjustment of the circuit with a precision knob at the back;
- The shape of the helmet is designed in such a way as to ensure the widest possible field of view upwards while climbing;
- Comfortable interior finish with soft foam in the front part;
- Reliable headlamp holders;
- A buckle under the chin designed in such a way that it opens up when the appropriate force acts;
- Possibility of attaching safety earmuffs.
- Wide adjustment range 53-63cm;

Specification

Material	ABS6 m
Weight	0,4 kg
Size	53-63 cm
Users	1
Standard	EN 397
Warranty	12 months
