

TRAX RB LIGHT

Safety point

The TRAX RB LIGHT safety point is an anchoring device attached to a sheet with a standing seam, designed to attach personal fall protective equipment. It meets the requirements of the EN 795: 2012 type A/C standard and the CEN/TS 16415: 2013 Technical Specification.

The TRAX RB LIGHT safety point is an anchoring device permanently installed on standing seam metal sheets 0,5mm titanium zinc, 0,7mm aluminium, stainless steel, 0,6mm copper, coated steel and 0,5mm aluminium zinc). Fastening is done by means of special clamping jaws screwed to the seam of the sheet. Trax RB light is used as a stand-alone point or as an intermediate support for a crossing point in a rope system (it cannot be used as an end or corner point).

Technical Specifications

Material:	INOX
Weight:	2 kg
Users:	2
Norm:	EN 795 typ A/C, CEN/TS 16415: 2013
Warranty:	1 year

Mounting substrates:

Standing seam metal sheet: titanium-zinc 0.5mm, aluminum 0.7mm, stainless steel, copper 0.6mm, coated steel and aluminum-zinc 0.5mm
