

IKAR HWS 12

Retractable type fall arrester

The IKAR HWS 12 retractable type fall arrester is a personal fall protection device. It has a lightweight aluminum housing with a galvanized steel cable as the connecting means and a swivel suspension. The standard connecting element is IKV 21 (EN 360) IKV 33 (ANSI, CSA). Other carabiners available extra

The device can be used horizontally, which makes it very universal. It has been tested to work on steel edges without burrs using the VGII CNB / P / II.060 method (edge A 0,5 mm).
